Ahanaf Mokammel Omi

has successfully completed the online Professional Certificate

Microsoft DevOps Engineering AZ-400

Now that you have completed the DevOps Engineering Professional Certificate, you stand out with a unique set of skills and knowledge in enterprise DevOps platform engineering. This certificate demonstrates your job readiness and can be shared with your professional network. Throughout this program, you've engaged with instructional videos, assessments, and practical exercises, gaining a deep understanding of key aspects of DevOps engineering, including: architected enterprise Azure DevOps and GitHub governance structures; built reusable CI/CD pipeline templates and event-driven automation frameworks; designed secure container supply chains and IaC module libraries; and deployed full-stack observability and distributed-tracing solutions.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.

Amazon Web Services (AWS)

Ahanaf Mokammel Omi

AWS Instructor

has successfully completed the online Professional Certificate

AWS Developer

This course is designed as preparation for the AWS Certified Developer - Associate. This certificate recognizes the successful completion of an 18-course AWS Developer learning plan. The recipient demonstrated knowledge of building serverless APIs with AWS Lambda and Amazon API Gateway, adding data storage, caching, messaging, and streaming, running containers and Amazon EC2, and securing, deploying, and monitoring applications on AWS. Through hands-on labs, they applied these skills by deploying a serverless API with AWS SAM, building an event-driven workflow with Amazon SNS, Amazon SQS, and AWS Lambda, transforming data with Amazon Data Firehose, caching with Amazon ElastiCache, deploying and scaling containers on AWS Fargate with CI/CD, and rotating secrets with AWS Secrets Manager.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Nov 10, 2026

Ahanaf Mokammel Omi

has successfully completed the online Professional Certificate

Google Business Intelligence

Those who earn the Google Business Intelligence Certificate have completed three courses that include hands-on, practice-based assessments and are designed to prepare them for entry-level roles in business intelligence. They are competent in creating processes that transform data into actionable insights to inform business decisions, developing data visualizations, and building dashboards that employ design best practices to meet stakeholder needs.

10 Courses

- Develop Generative AI Applications: Get Started
- Build RAG Applications: Get Started
- Vector Databases for RAG: An Introduction
- Advanced RAG with Vector Databases and Retrievers
- Build Multimodal Generative AI Applications
- Fundamentals of Building AI Agents
- Agentic AI with LangChain and LangGraph
- Agentic AI with LangGraph, CrewAI, AutoGen and BeeAI
- Build AI Agents using MCP
- RAG and Agentic AI Capstone Project

Oct 31, 2026

Ahanaf Mokammel Omi

has successfully completed the online Professional Certificate

IBM RAG and Agentic AI

The certificate holder is proficient in building advanced generative AI applications using RAG, agentic, and multimodal AI technologies. They understand the core concepts and real-world applications of generative AI and agent frameworks. They can design effective prompts, implement function calling, and use tools like LangChain to orchestrate complex reasoning workflows. They can build autonomous and collaborative agents that use memory, feedback, and chaining to solve structured and unstructured problems. They are able to integrate APIs, tools, and multi-step reasoning to create flexible, self-improving systems. They can design multi-agent architectures using frameworks like CrewAI and LangGraph, enabling distributed decision-making, and dynamic context switching.

Laurence Moroney
Instructor

Ahanaf Mokammel Omi

has successfully completed the online Professional Certificate

Generative AI for Software Development

Congratulations on completing all 3 courses of the Generative AI for Software Development Skill Certificate! As part of this Skill Certificate program, you have learned: how LLMs work and how to use them more effectively to support your work as a developer, how to use LLMs to quickly iterate and ship your code, how to use LLMs to get production-ready code faster, and how to work better with your team by leveraging an LLM's knowledge of multiple deployment roles and tasks, and more! These skills will provide you with the practical expertise to leverage generative AI and augment your development workflow, making you more competitive in the job market.
